Hal---

Have you read "Farewell America" by James Hepburn (Frontiers, '68) which was printed in Belgium?

Contends that "committee" was back of assassination of JFK. Was composed of oilmen, some Dallas cops, CIA operatives, Roy Cohn, H.L. Hunt and assorted Minutemen. Author maintains there were four gunmen, that Oswald's shot hit Gov. Connally. Mentions the Chicago plot but states there were at least one or two other previous planned-for attempts which never came off.

Best,
